Art Unit: 2644

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1 to 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kowaki.

Kowaki discloses an audio system which is comprised of a first directional audio channel signal source (SFL and SFR); a surround audio channels signal source (SRL and SRR); a first electroacoustical transducer coupled to the first directional audio signal and to the surround audio channel source (col. 7, lines 4 to 10); the first electroacoustical transducer constructed and arranged to radiate sound waves corresponding to audio signals from the first directional audio channel signal source and corresponding to audio signals from the surround audio channel signal source (col. 7, lines 11 to 12); a second electroacoustical transducer coupled to the first directional audio signal source (speaker for FL); the second electroacoustical transducer constructed and arranged to radiate sound waves corresponding to audio signals from the first directional audio channel signal source (radiate signal FL); a first and a second audio scaling devices (different scaling devices are within matrix processing device 6); a second directional audio channel source (SCE); and a third electroacoustical transducer (speaker for RR). Kowaki does not disclose that a first transducer is situated behind a first passenger location, a second transducer is situated forward of a first transducer and a third transducer is situated behind a second passenger location. However, even though Kowaki does not explicitly disclose exact

Art Unit: 2644

locations for the speakers as claimed, it would have been obvious to one skill in the art to situated the speakers as claimed because it would have been merely a design choice to have the speakers situated at different locations within a vehicle.

3. Applicant's arguments with respect to claims 1 to 9 have been considered but are moot in view of the new ground(s) of rejection.

4. Any inquiry concerning this communication or earlier communication from the examiner should be directed to **Minsun Oh Harvey** whose telephone number is **(703) 308-6741**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Bill Isen**, can be reached at **(703) 305-4386**.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

Or faxed to:

(703) 872-9314 (for Technology Center 2600 only)

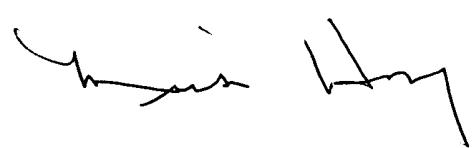

Application/Control Number: 09/757,338
